0 Exit

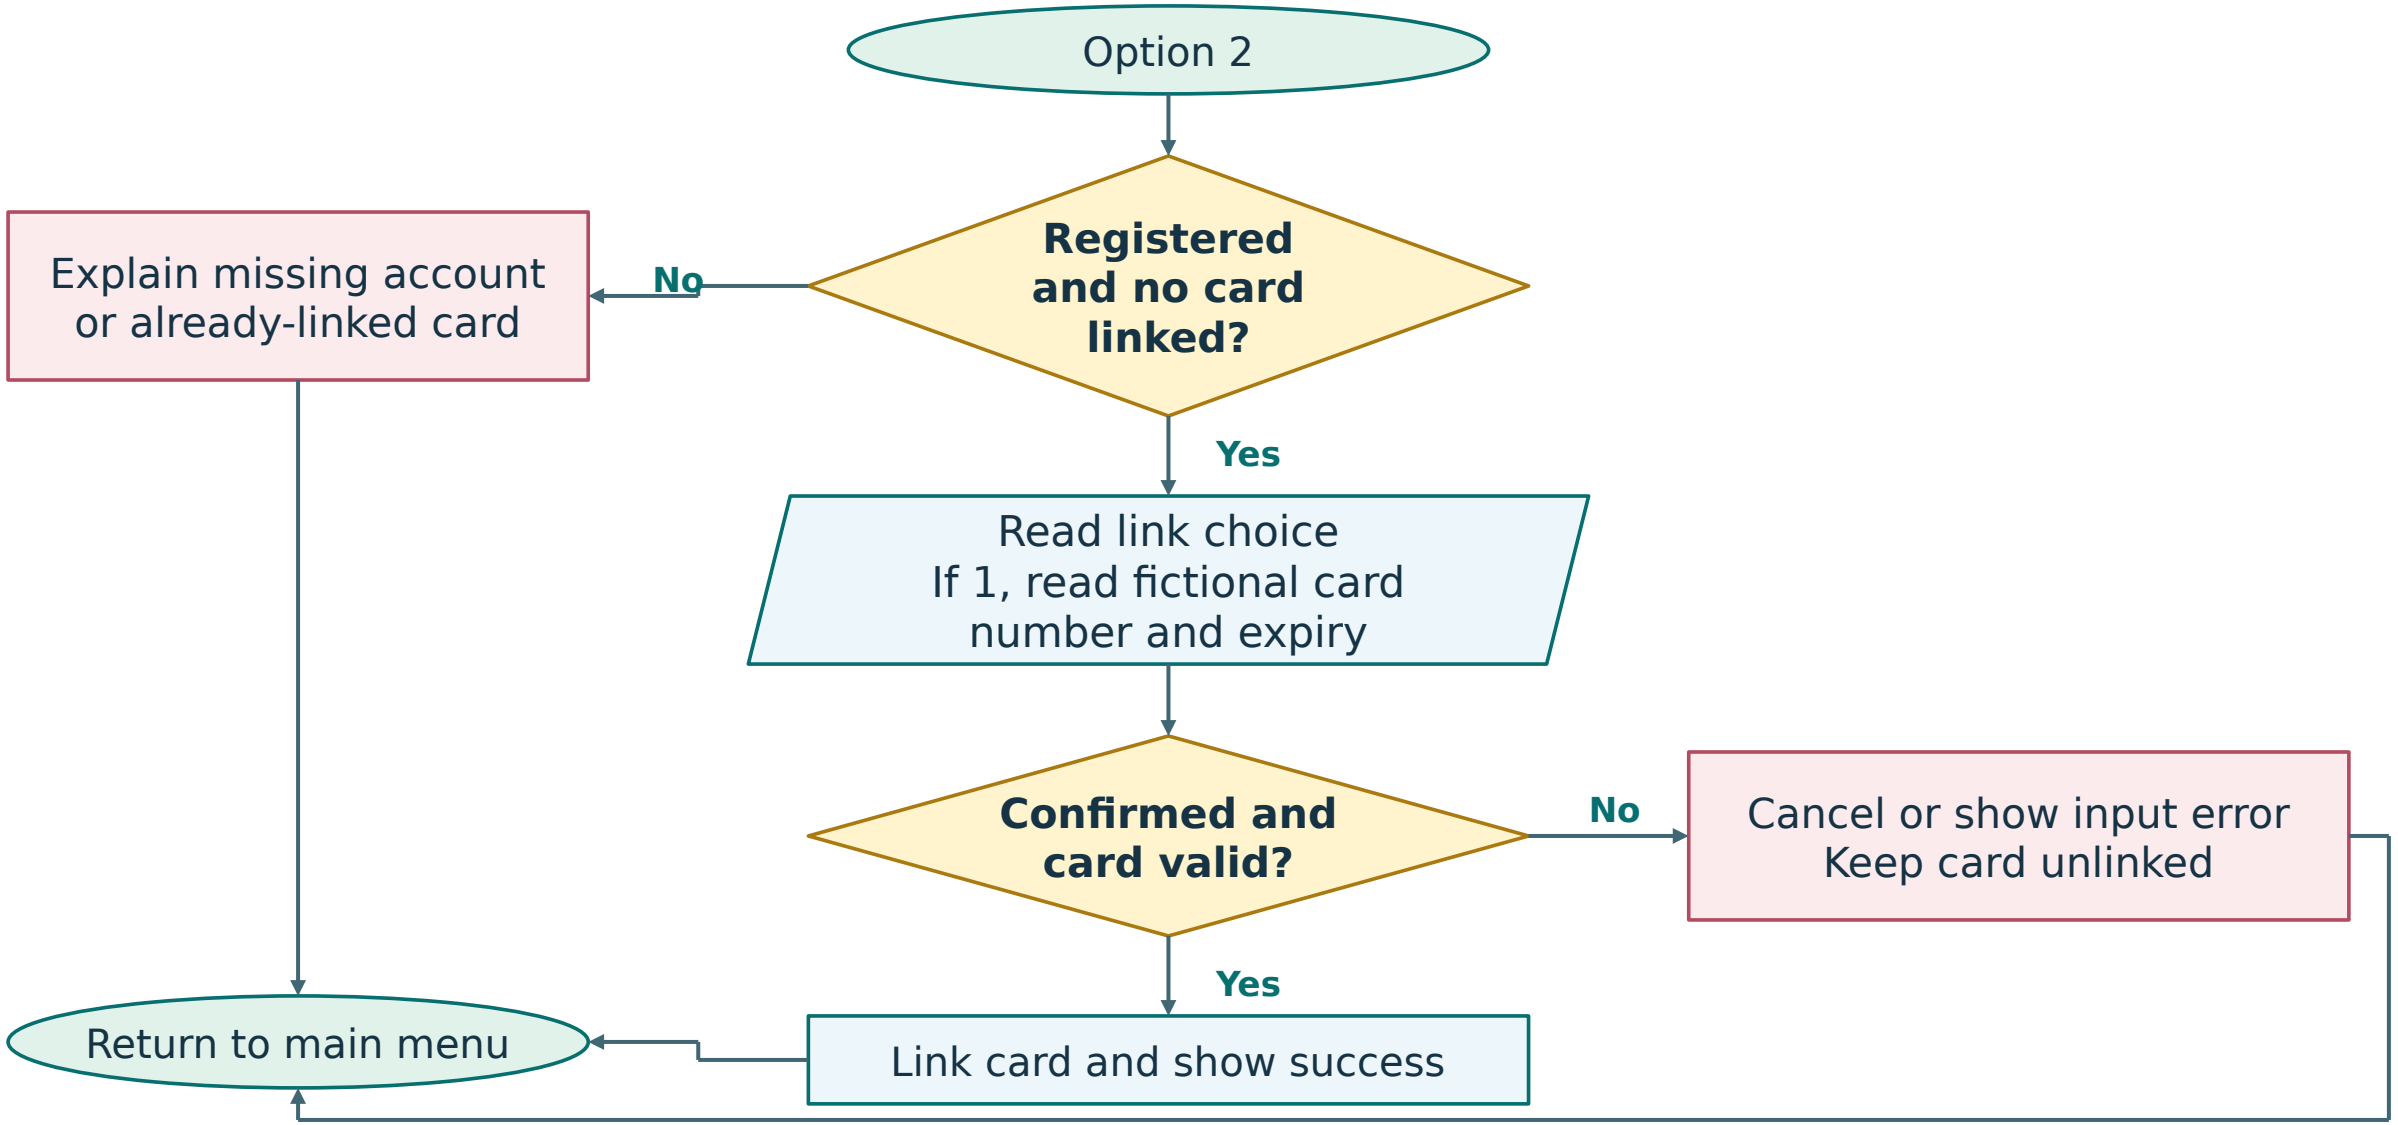

Student registration

Enter 12 digits between S and M. Phone: 372 followed by 8 digits.

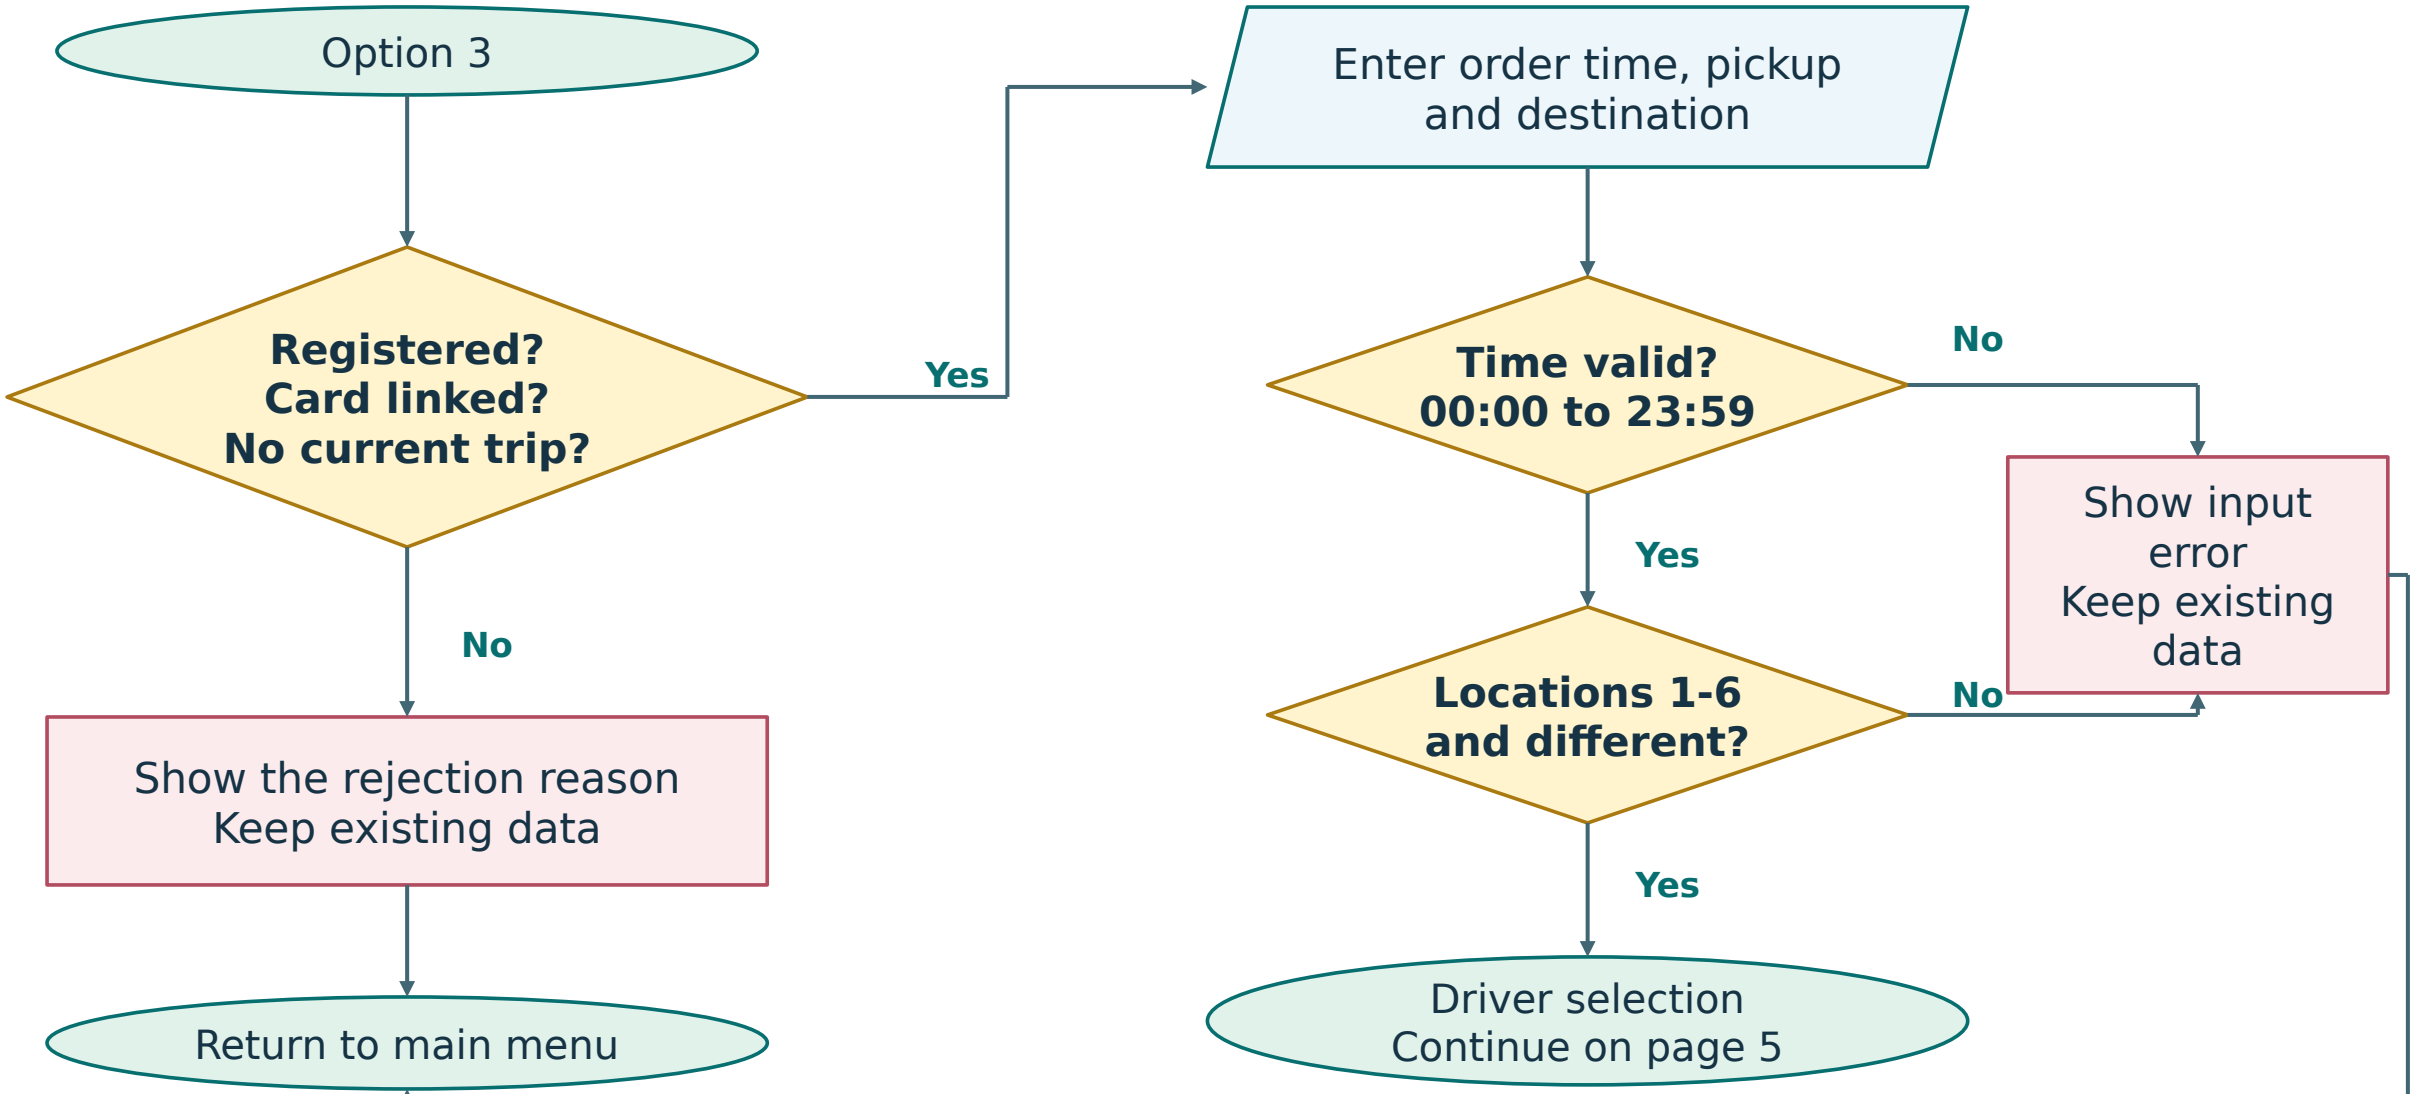

Fictional bank-card linking

A registered account can hold one linked demonstration card.

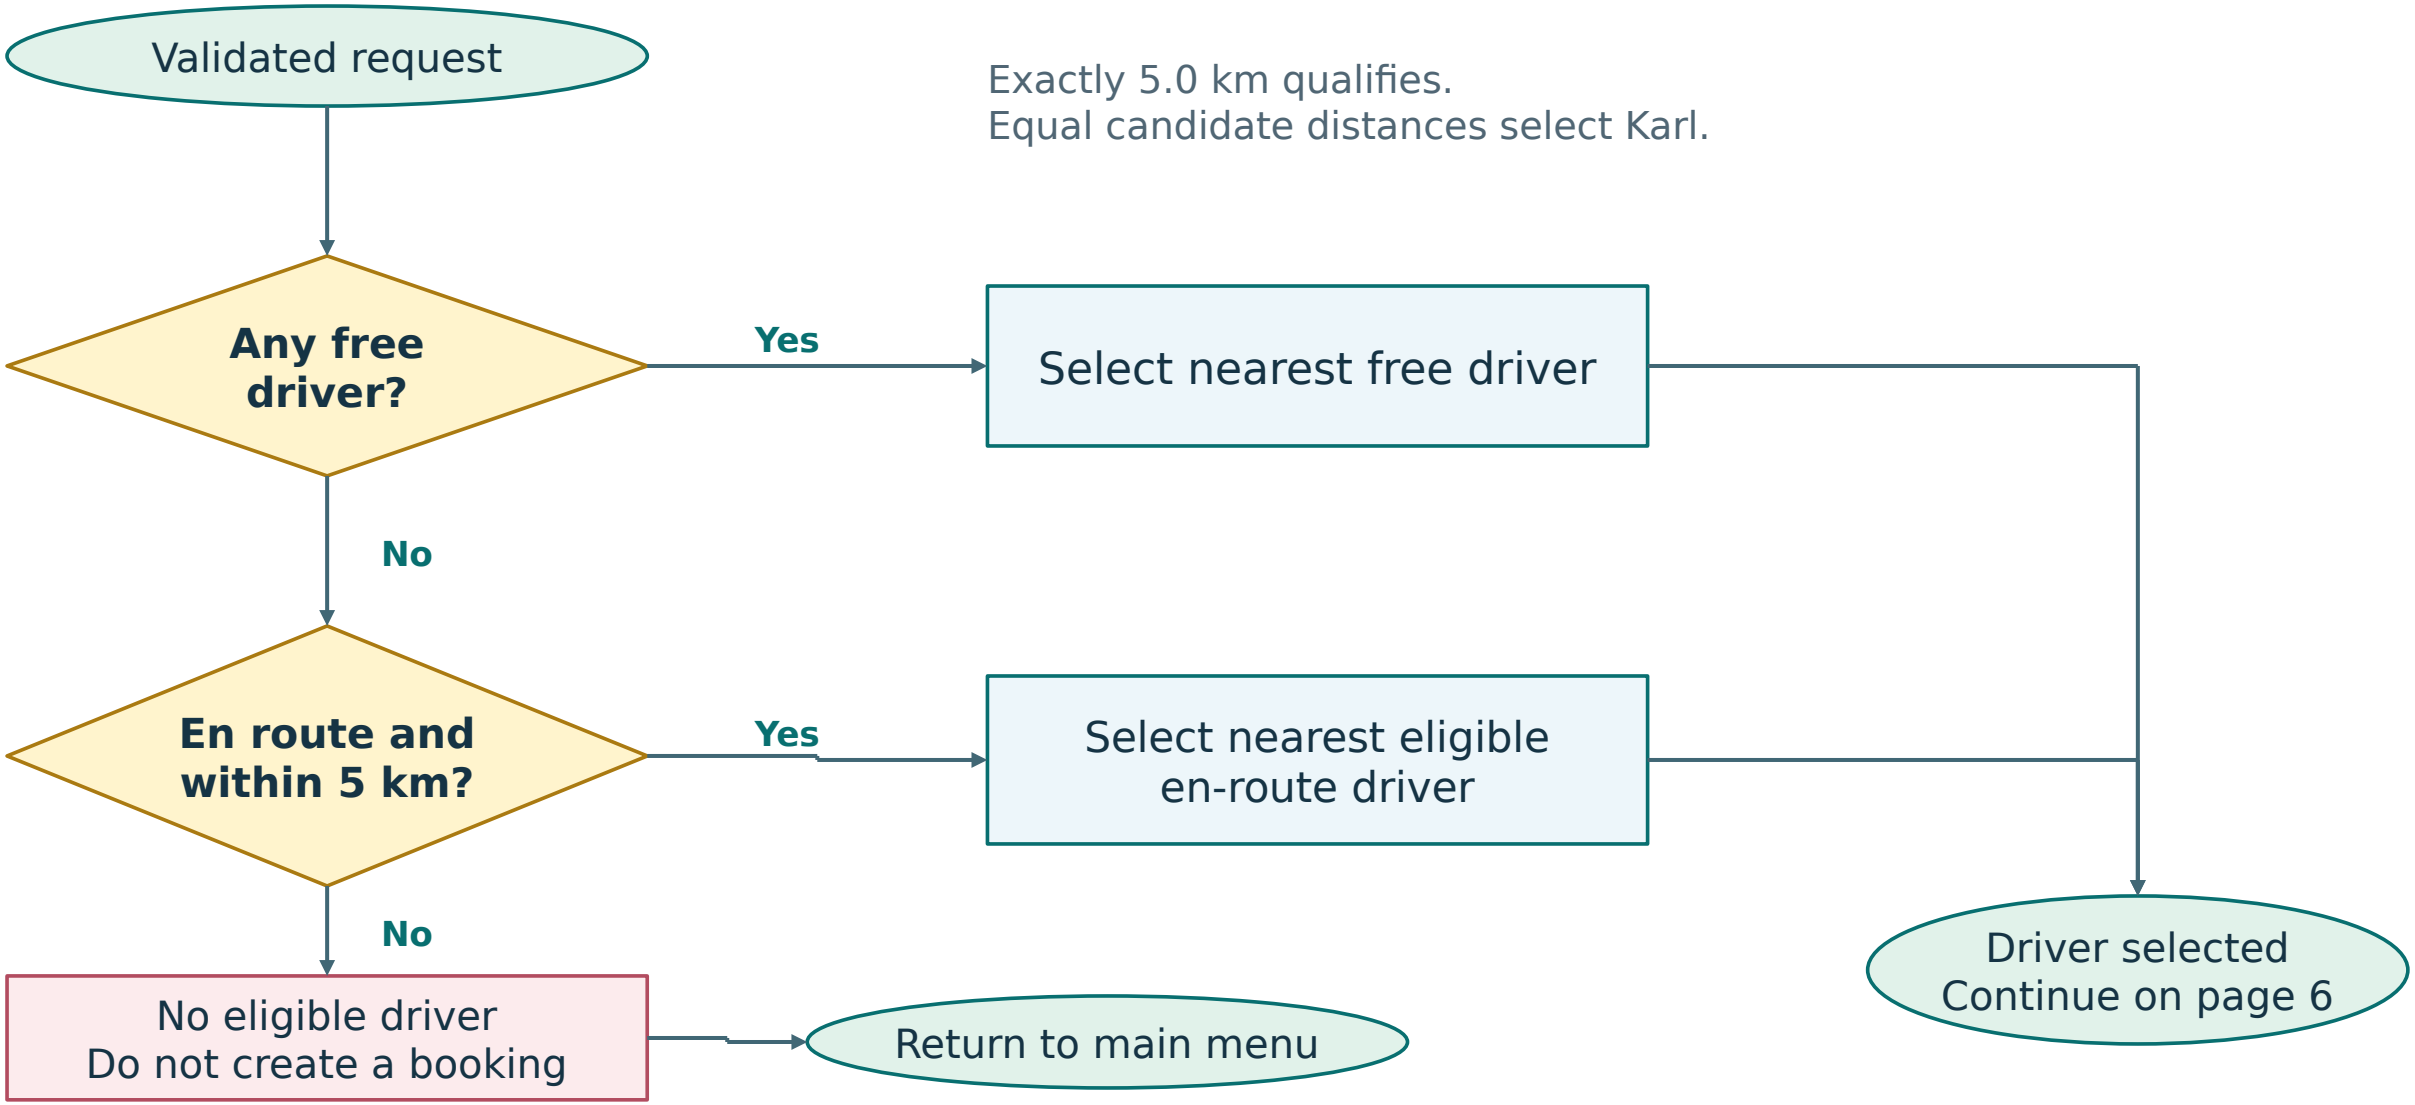

Booking validation

Only a valid request can continue to driver selection.

Driver selection

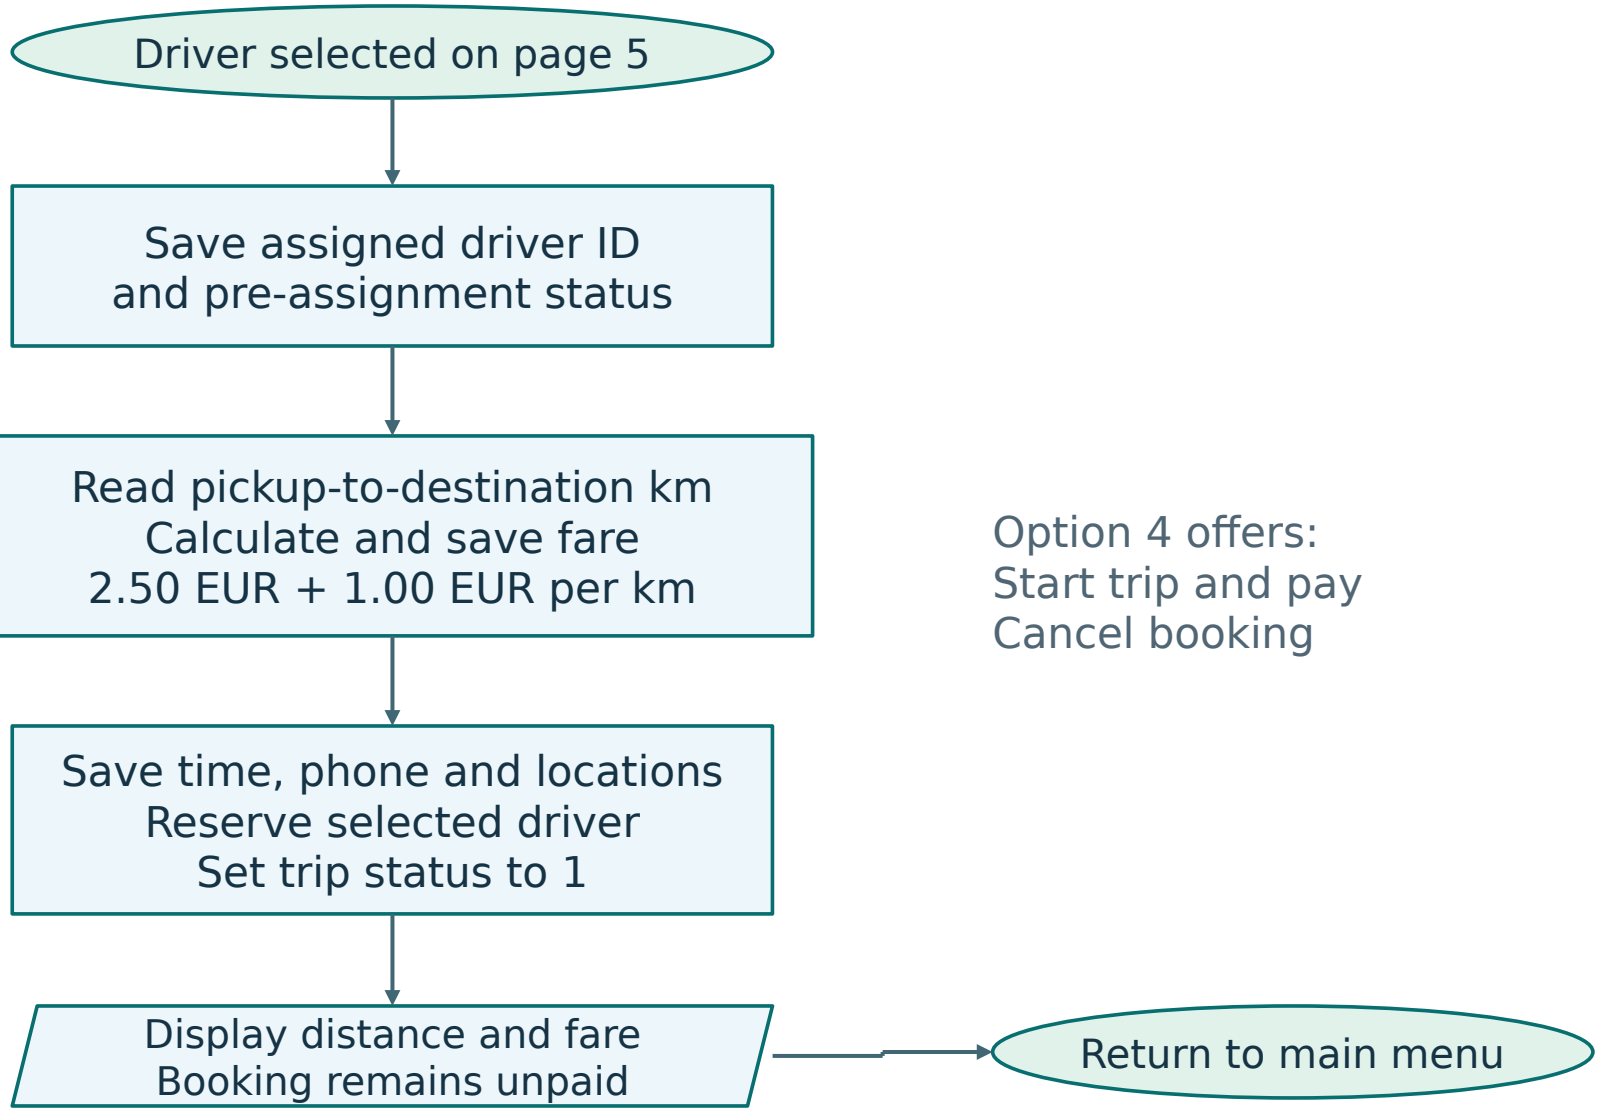

Free drivers take priority. Busy drivers qualify only when en route and within 5 km.

Exactly 5.0 km qualifies.
Equal candidate distances select Karl.

Booking confirmation and fare

Reserve the selected driver after validation and successful selection.

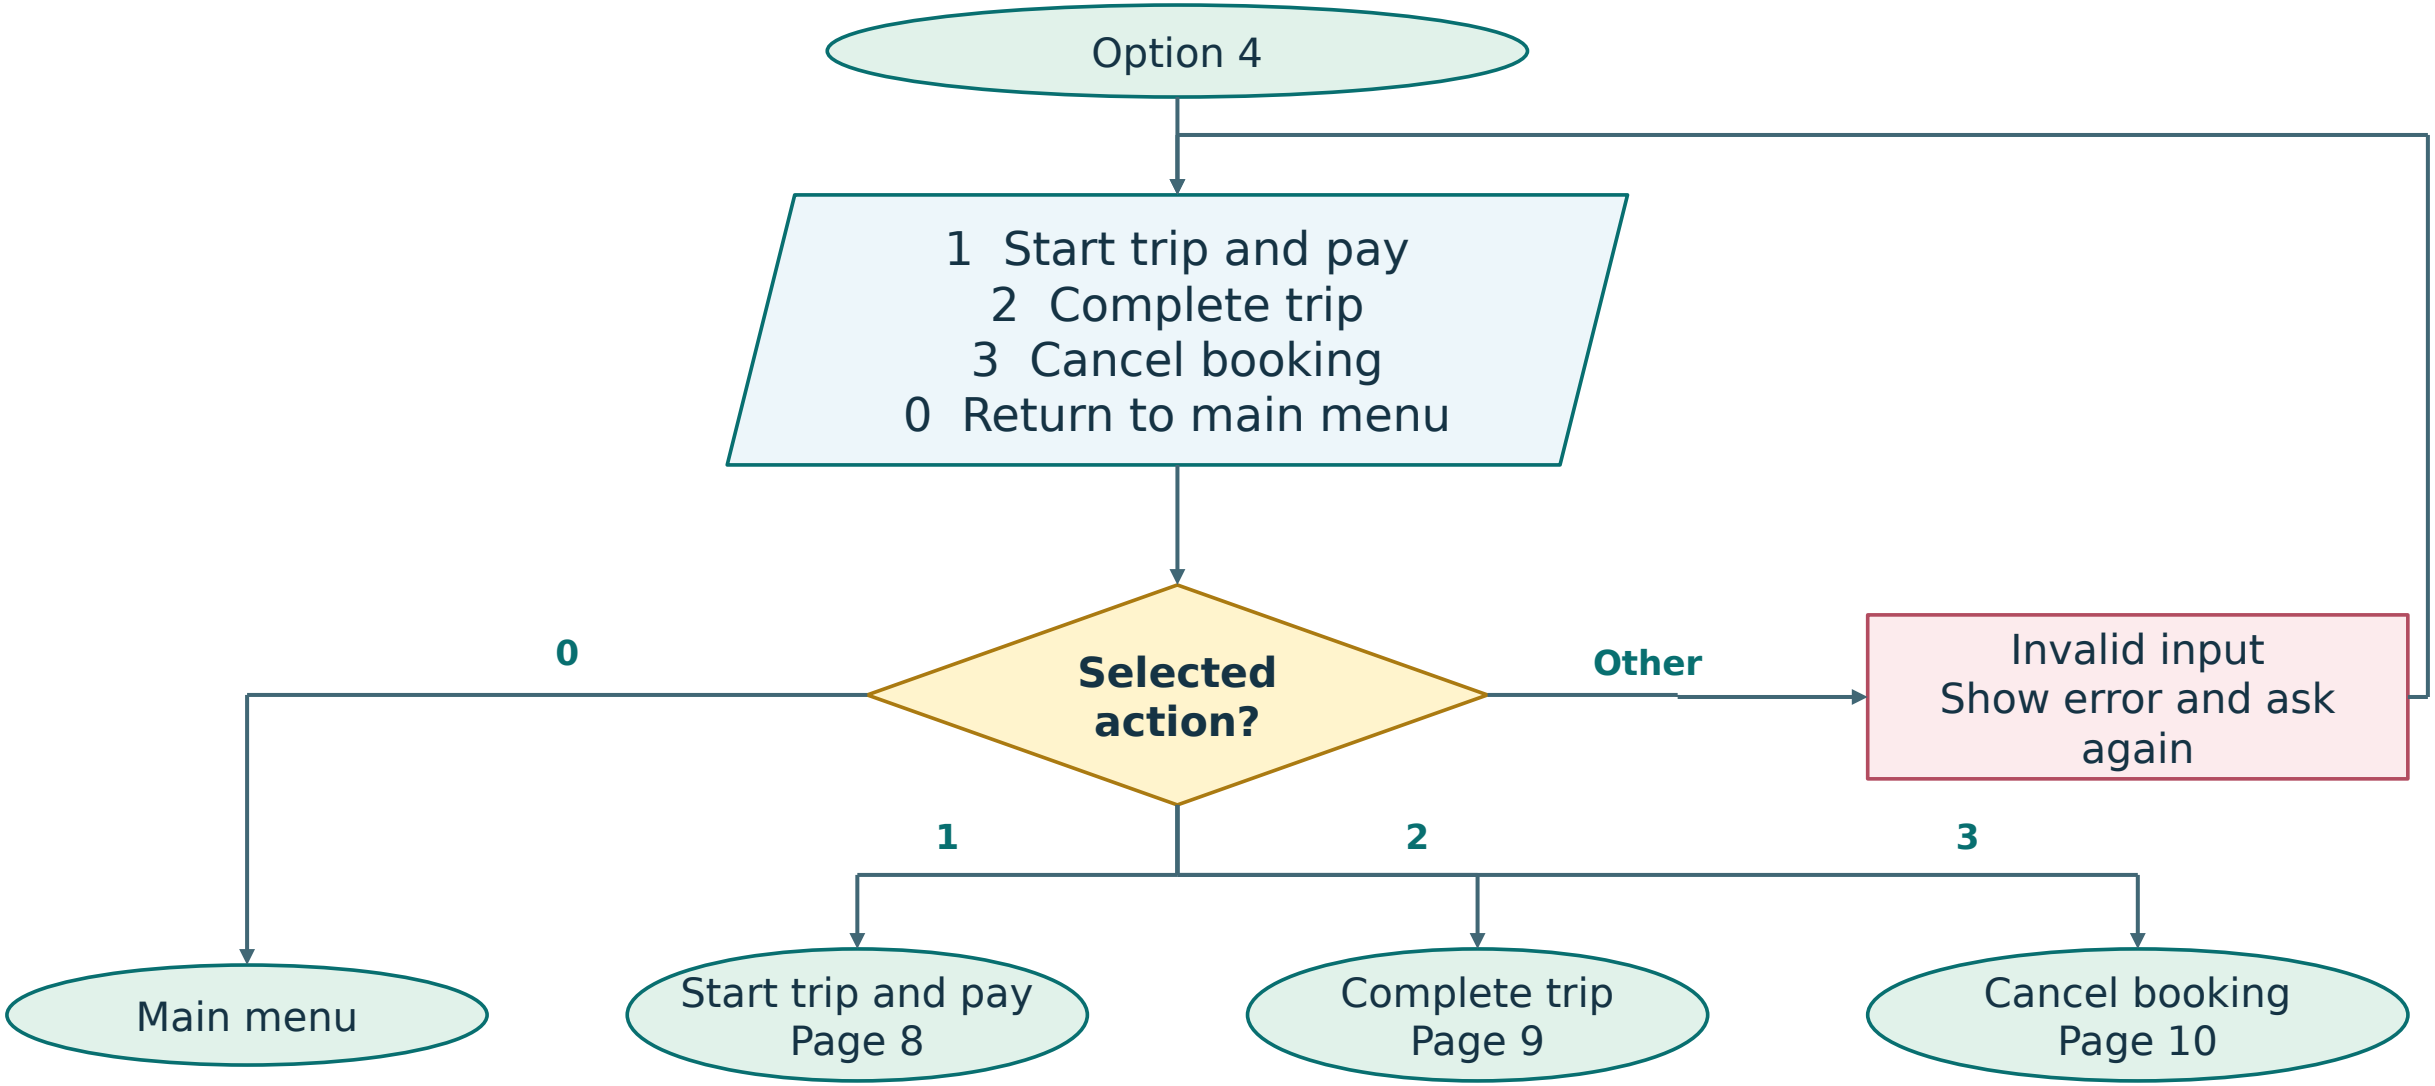

Example
TalTech to Tallinn Airport
9.2 km
Fare 11.70 EUR

Option 4 offers:
Start trip and pay
Cancel booking

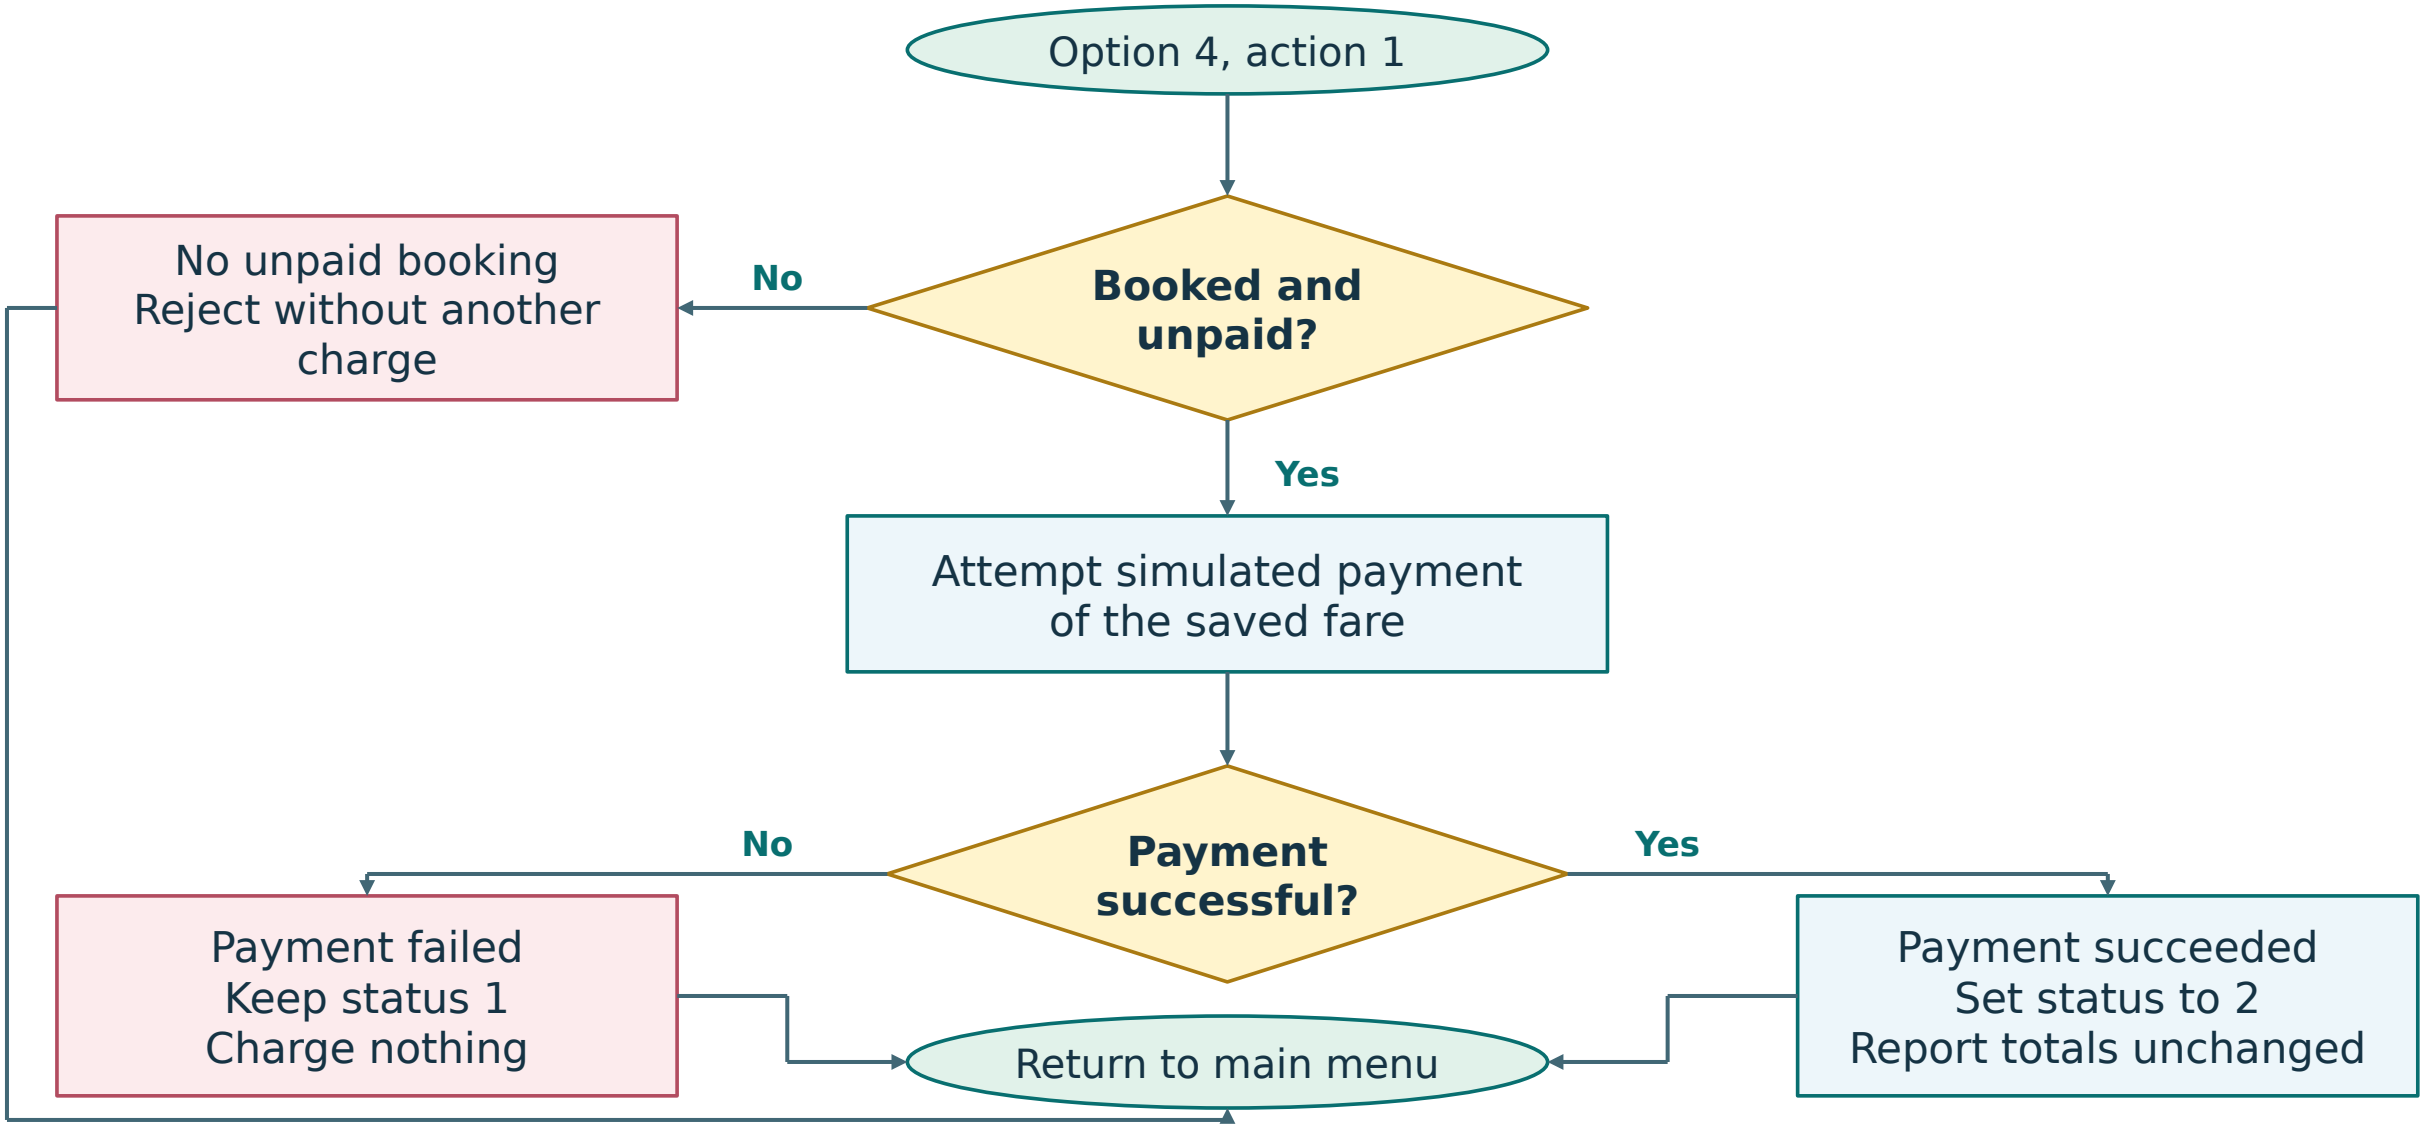

Current-trip menu

Trip status: 0 = none, 1 = booked and unpaid, 2 = started and paid.

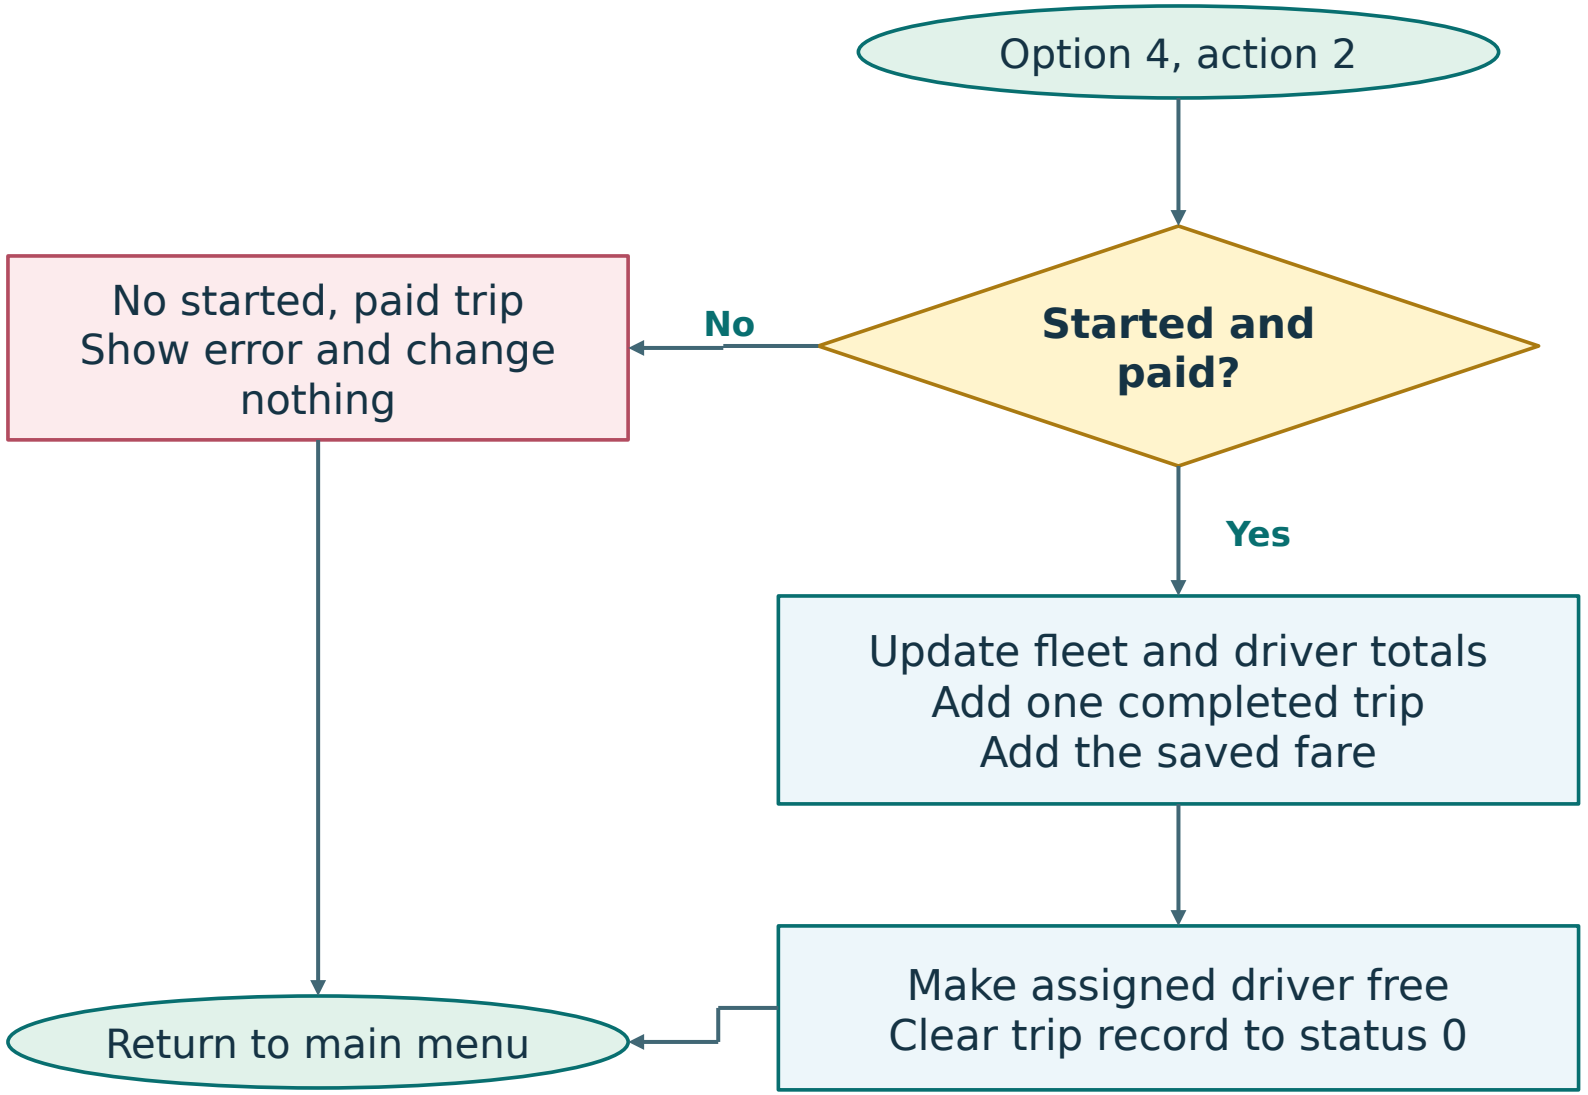

Start trip and pay

A successful simulated payment starts the trip. Charge the saved fare once.

Trip completion

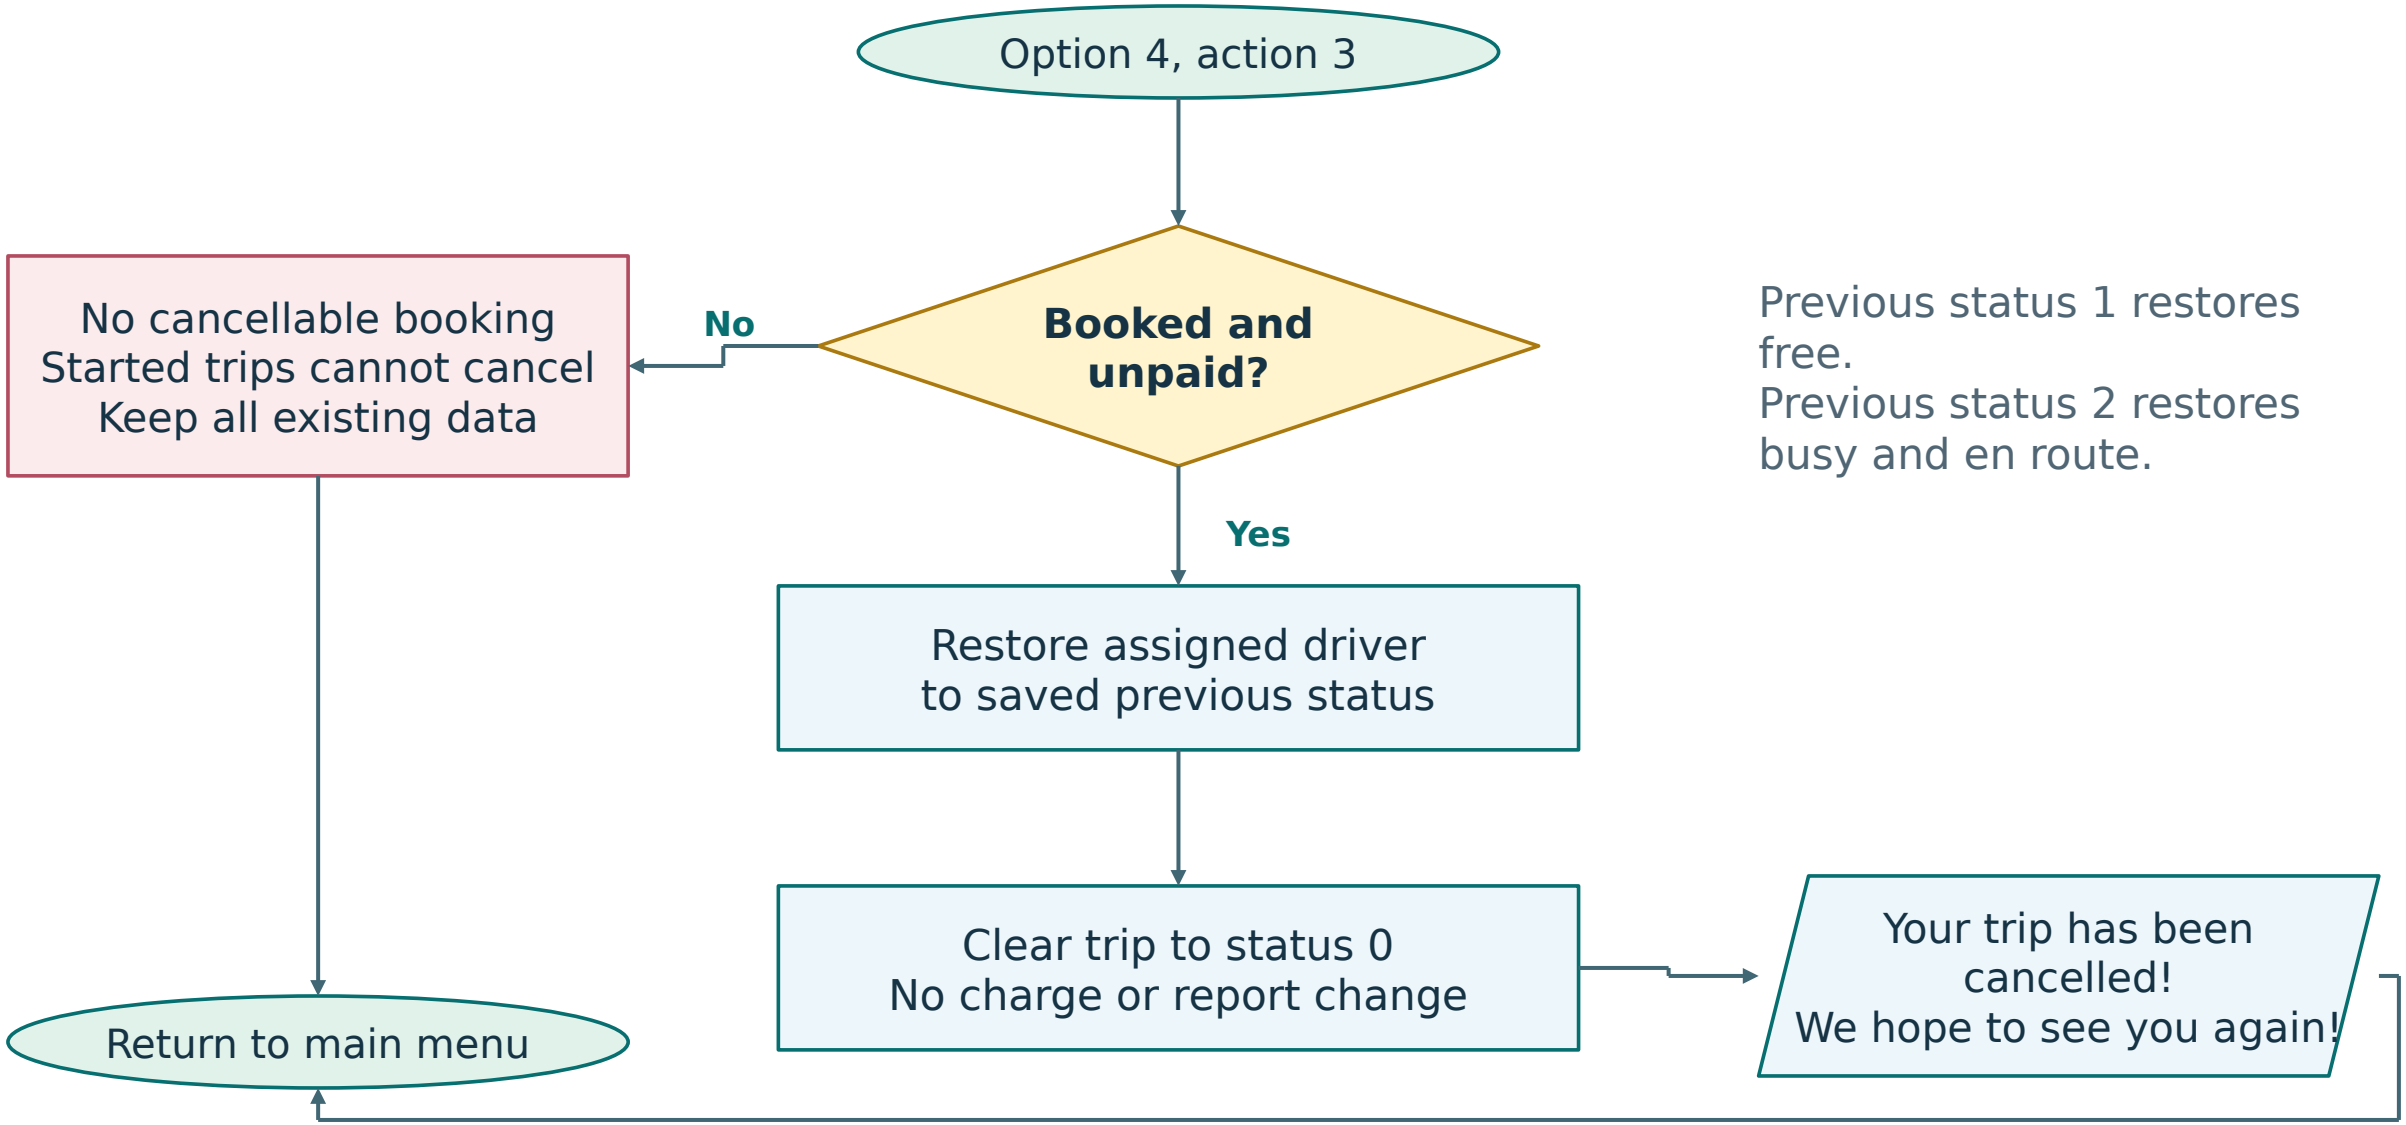

The trip is already paid. Completion records the revenue and releases the driver.

Do not charge again. Clearing the trip prevents a second completion.

Booking cancellation

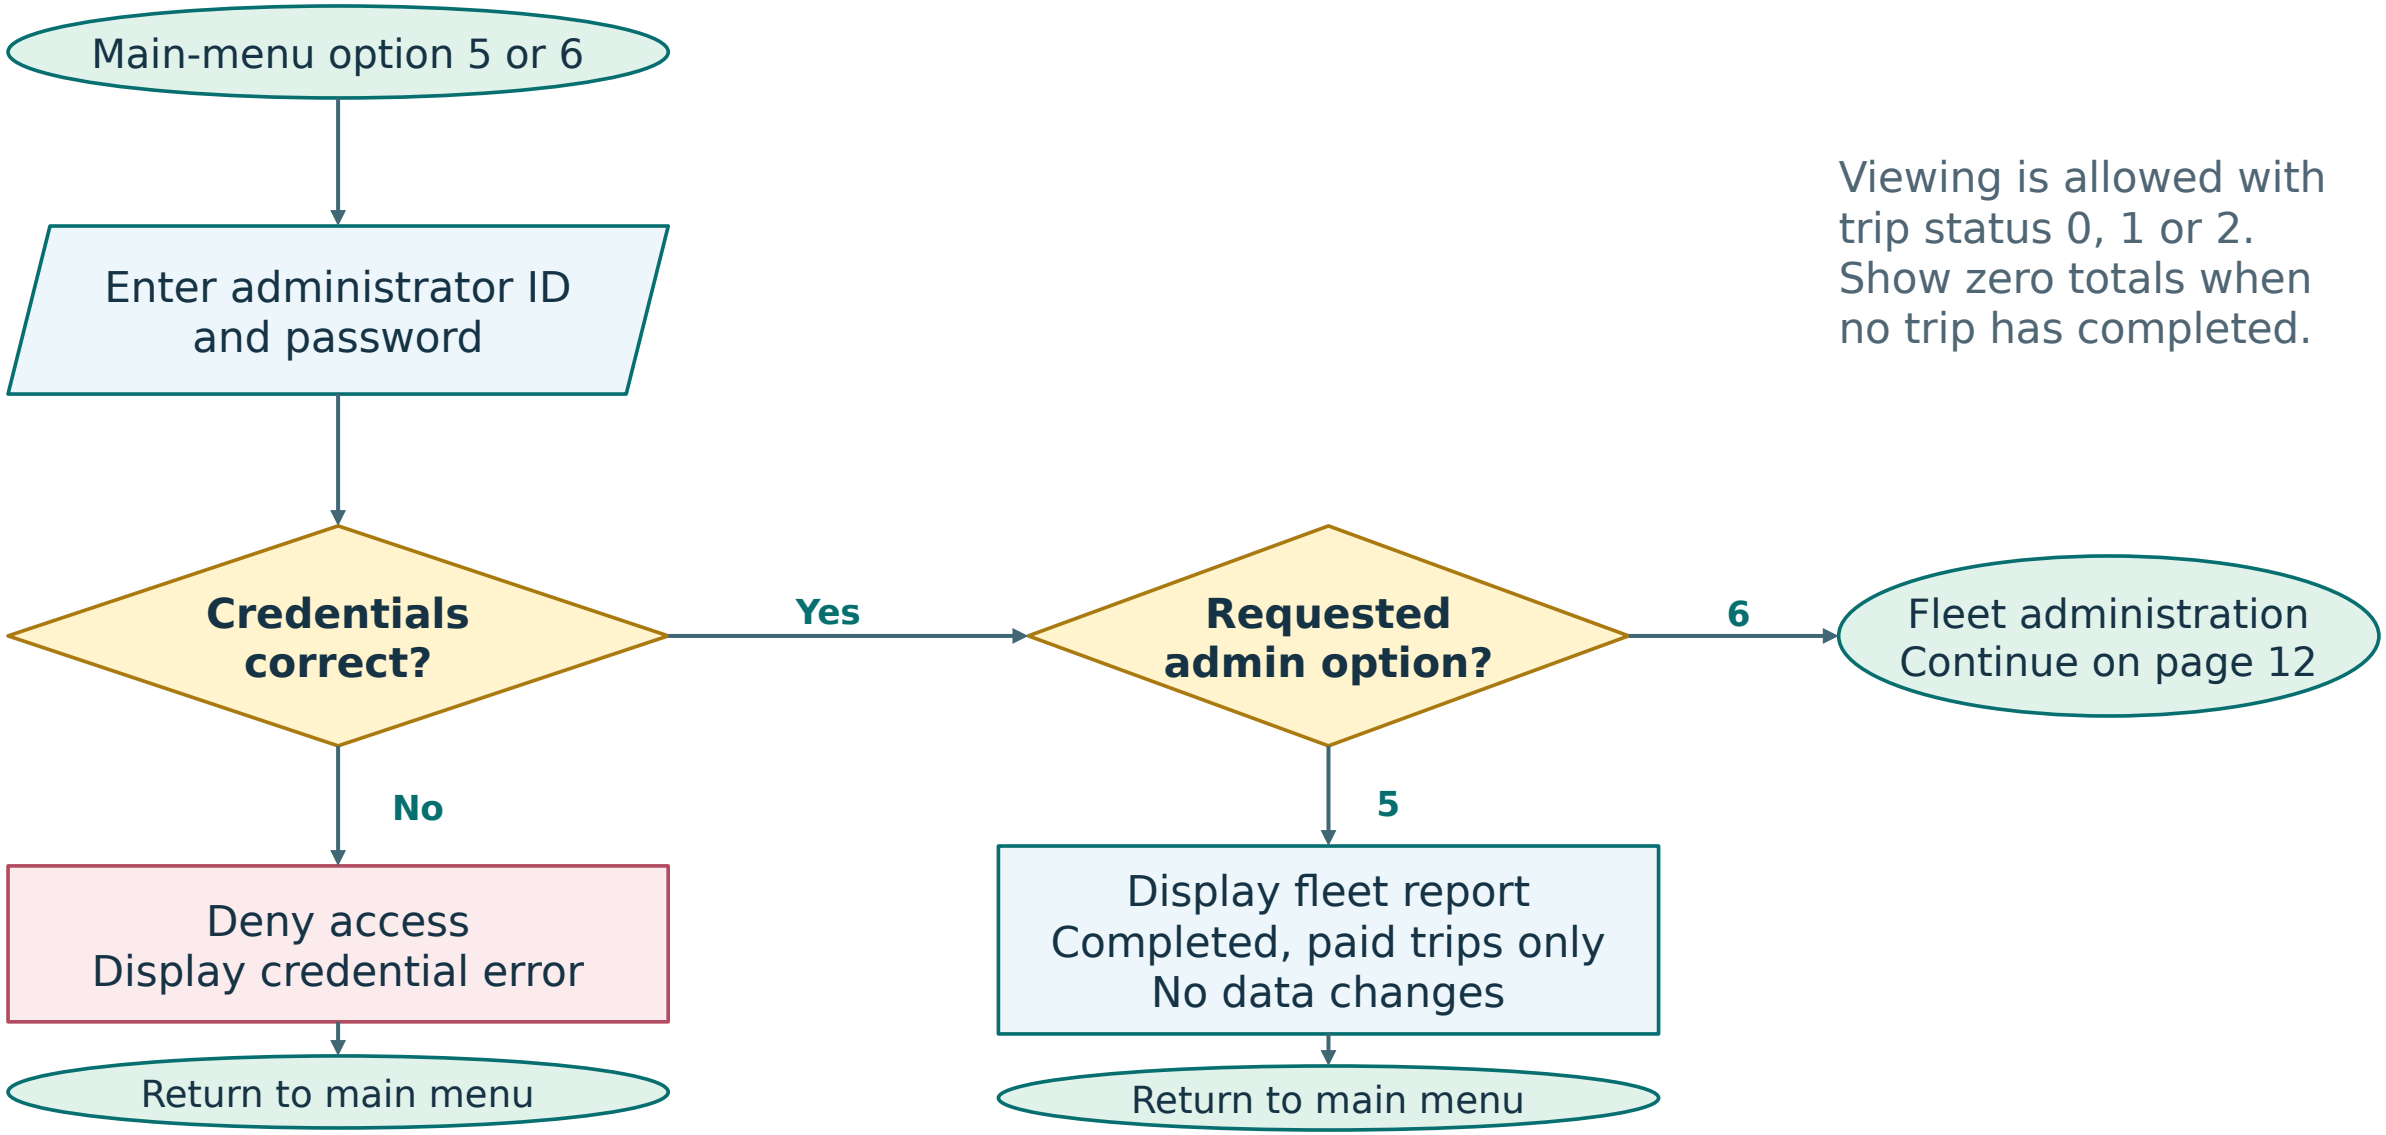

Only a booked, unpaid trip can be cancelled.

Previous status 1 restores free.
Previous status 2 restores busy and en route.

Administrator access and reports

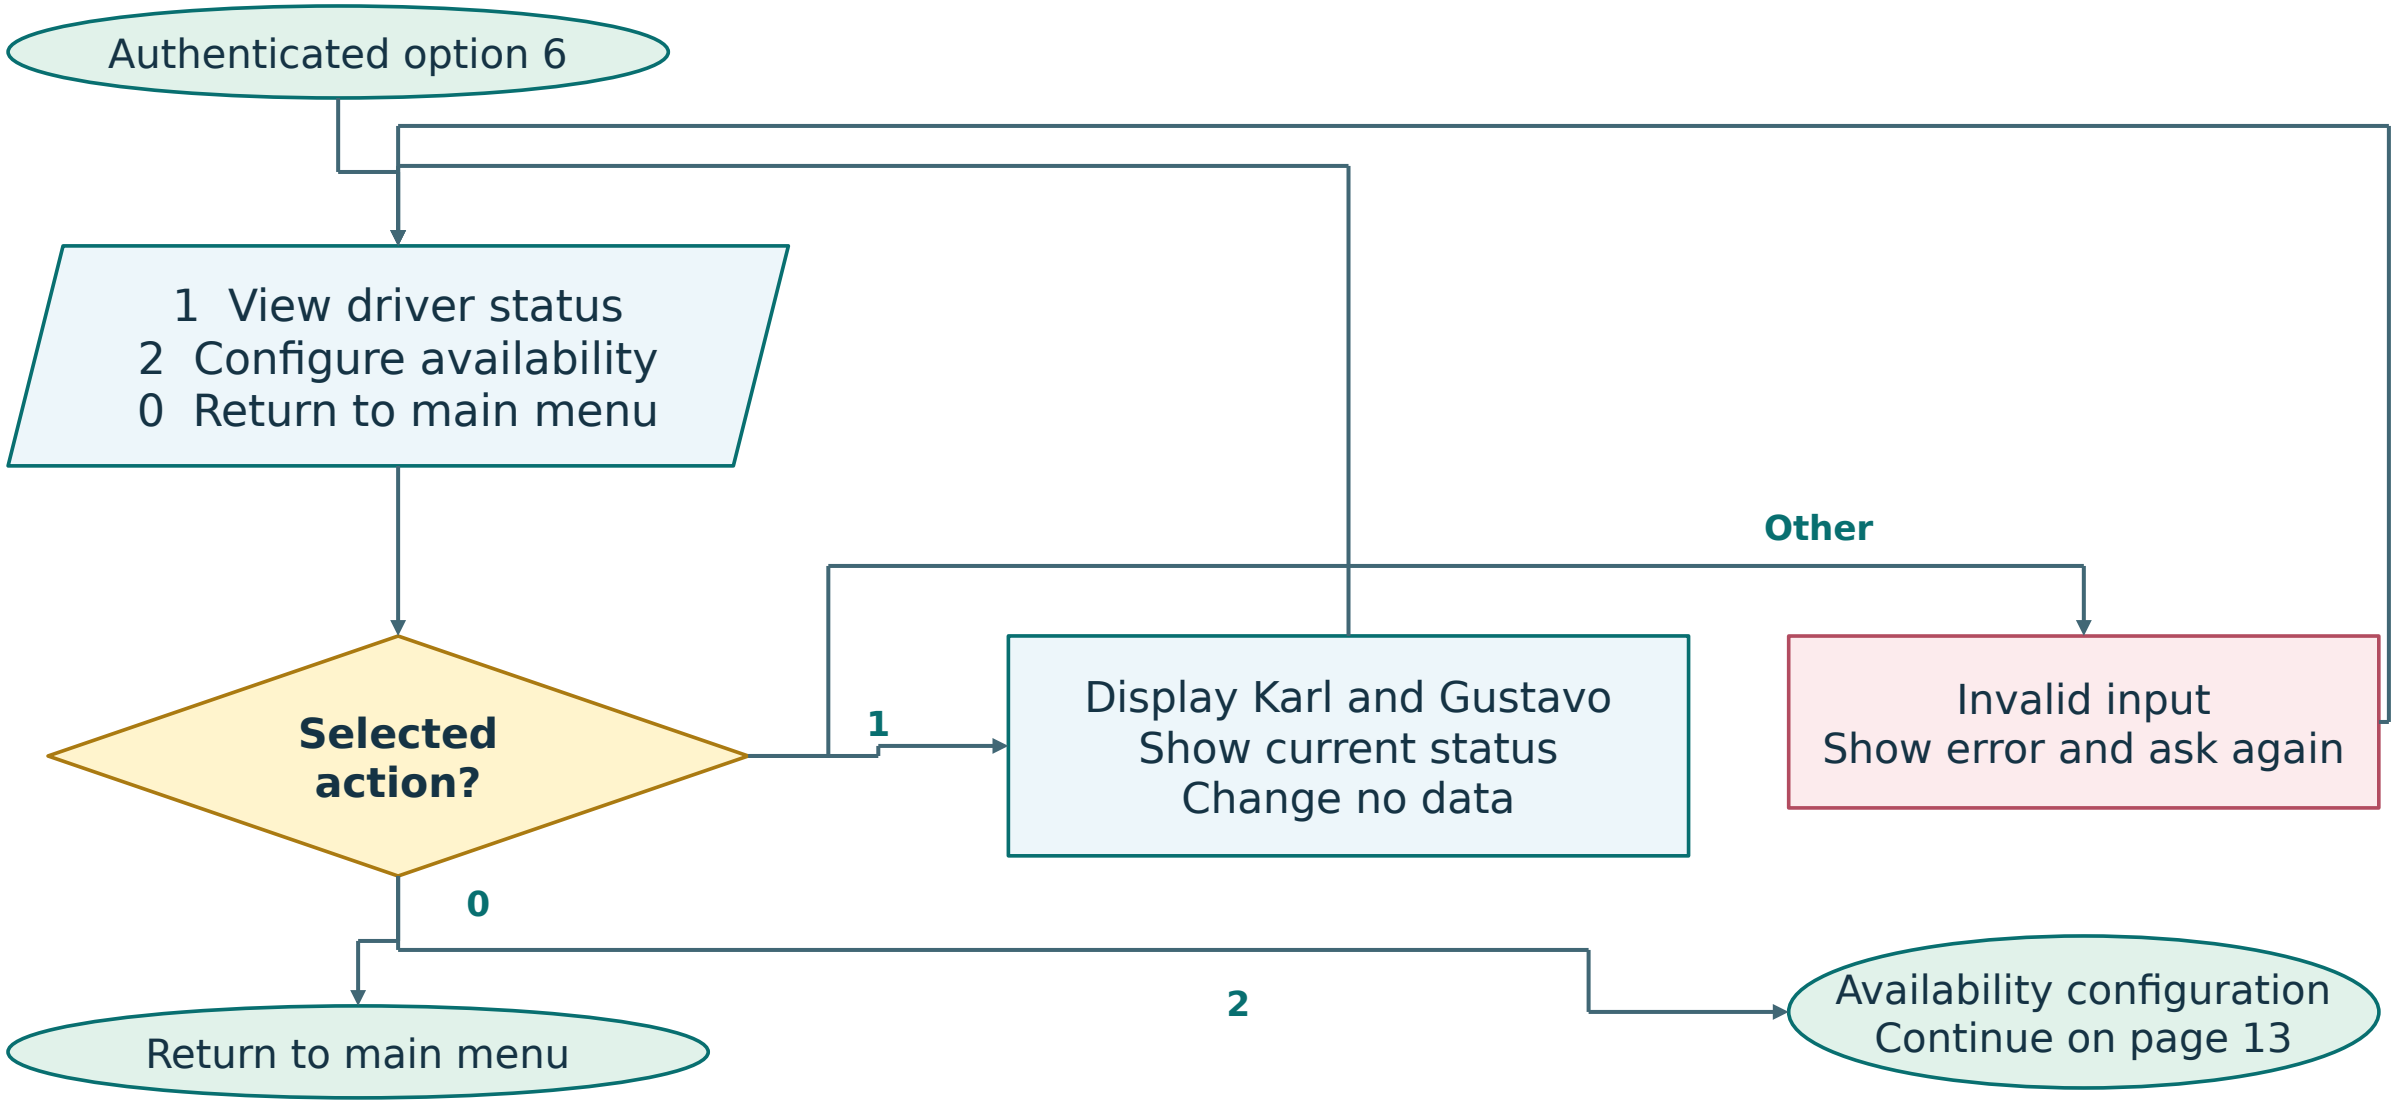

Authentication protects administrative viewing. A current trip does not block viewing.

Viewing is allowed with trip status 0, 1 or 2. Show zero totals when no trip has completed.

Fleet-administration menu

An authenticated administrator can always inspect current driver status.

Driver-availability configuration

Change availability only when no student trip is booked or started.
